PROJECTS

Moving vehicle plate detection System (MVPDS)

This project aims to create a system that can detect and read license plates of moving vehicles in real-time.

- **Objective**: Real-time license plate detection for traffic and law enforcement.
- **Technologies Used**: Python with libraries and frameworks such as Numpy, CVzone, OpenCV, Tkinter, YOLO for object detection, OCR for text recognition, and machine learning algorithms to ensure high accuracy.
- **Key Features:** Provides high accuracy in detecting fast-moving vehicles, real-time processing capabilities, and a user-friendly interface using Tkinter.

THE HANGING BALLOONS DECORATION WEBSITE

The Hanging Balloons is a web portal for booking various decoration services for occasions and loved ones.

- **Technologies Used:** Frontend developed with HTML, CSS, Bootstrap, and JavaScript; MongoDB used for database.
- **Functionality**: Allows users to explore and book decoration options, with backend functionalities powered by JavaScript.
